¹ Performance information prior to March 7, 2022, reflects time periods when the fund was classified as a diversified fund. The fund was reclassified from diversified to non-diversified effective March 7, 2022.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

^{F1} Included in all fund classes' total returns for the year ended December 31, 2017, are proceeds received from a non-recurring litigation settlement against Household International Inc. Had these proceeds not been included, all total returns within calendar year 2017 would have been lower by 0.89%.

^{S1} On August 14, 2019, the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

^{A1} Performance for Class A shares for periods prior to their offering is derived from the performance of the fund's Class R6 shares, adjusted to take into account differences in sales loads and class-specific operating expenses, such as Rule 12b-1 fees and certain shareholder servicing (including sub-accounting) costs, if any. In addition, the performance shown for Class A shares for periods prior to their offering does not reflect any applicable fee reductions and waivers and expense reimbursements that were in effect prior to the offering of Class A shares. Please see the prospectus for additional information about performance and expenses.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

^{S2} Effective May 29, 2015, the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

^{S3} Effective November 29, 2019 the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

Class A shares ("A") results include the maximum sales charge.

¹ Performance information prior to March 7, 2022, reflects time periods when the fund was classified as a diversified fund. The fund was reclassified from diversified to non-diversified effective March 7, 2022.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

^{F1} Included in all fund classes' total returns for the year ended December 31, 2017, are proceeds received from a non-recurring litigation settlement against Household International Inc. Had these proceeds not been included, all total returns within calendar year 2017 would have been lower by 0.89%.

^{S1} On August 14, 2019, the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

¹ Performance information prior to March 7, 2022, reflects time periods when the fund was classified as a diversified fund. The fund was reclassified from diversified to non-diversified effective March 7, 2022.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

^{F1} Included in all fund classes' total returns for the year ended December 31, 2017, are proceeds received from a non-recurring litigation settlement against Household International Inc. Had these proceeds not been included, all total returns within calendar year 2017 would have been lower by 0.89%.

^{S1} On August 14, 2019, the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

Class B shares ("B") results include the applicable contingent deferred sales charge (CDSC), which declines over six years from 4% to 0%. The elimination of the charge begins six years after the end of the month in which shares were initially purchased.

Effective June 1, 2019, B shares will be closed to new purchases from new and existing investors.

* Periods less than one year are actual, not annualized.

² Performance information for periods prior to July 13, 2018 reflects periods when a subadvisor was responsible for managing the fund's tactical asset allocation overlay under a different investment process.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

Class B shares ("B") results include the applicable contingent deferred sales charge (CDSC), which declines over six years from 4% to 0%. The elimination of the charge begins six years after the end of the month in which shares were initially purchased.

¹ Performance information prior to March 7, 2022, reflects time periods when the fund was classified as a diversified fund. The fund was reclassified from diversified to non-diversified effective March 7, 2022.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

^{F1} Included in all fund classes' total returns for the year ended December 31, 2017, are proceeds received from a non-recurring litigation settlement against Household International Inc. Had these proceeds not been included, all total returns within calendar year 2017 would have been lower by 0.89%.

^{S1} On August 14, 2019, the fund closed to new investors subject to certain exceptions. Please see the prospectus for additional information.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

² Performance information prior to June 15, 2021 reflects time periods when the fund did not have an investment strategy of allocating a portion of its assets to investment grade quality debt instruments. The fund's investment strategies changed effective June 15, 2021.

³ Performance information for periods prior to July 13, 2018 reflects periods when a subadvisor was responsible for managing the fund's tactical asset allocation overlay under a different investment process.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

Class C shares have no initial sales charge but if they are redeemed within 1 year from the end of the prior month of purchase, they may be subject to a 1% contingent deferred sales charge (CDSC).

** A small portion of income may be subject to state, federal, and/or alternative minimum tax. Capital gains, if any, are subject to a capital gains tax.

^{E1} **Gross Expense Ratio** is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance. These contractual reductions will continue until at least date noted under the "Waiver End Date" column.

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains.

Class C shares have no initial sales charge but if they are redeemed within 1 year from the end of the prior month of purchase, they may be subject to a 1% contingent deferred sales charge (CDSC).
